Technologies:

Mobile App	React Native
Website	PHP with Laravel
Admin Panel 1	PHP with Laravel
Admin Panel 2	PHP with Laravel
Backend	My SQL

Reason.

Why we use Laravel and PHP.

Yesterday I have conduct meeting with my team. so we have decided to use PHP with Laravel on web application instead of react js. React js will take to much time to make it perfect like responsive issue etc . and even we dont have much time to take risk so that we have decided to start with PHP with Laravel.

What is PHP?

Ans: PHP is a general-purpose scripting language especially suited to web development. It was originally created by Danish-Canadian programmer Rasmus Lerdorf in 1994.

What is Laravel?

Ans: Laravel is a web application framework with expressive, elegant syntax. ... Laravel attempts to take the pain out of development by easing common tasks used in the majority of web projects, such as authentication, routing, sessions, and caching.

Why is Laravel the best PHP framework in 2020?

Ans: Laravel is a highly secure, scalable, and maintainable thus being accredited as the best PHP framework to be used by developers. It supports MVC (Model View Controller) that makes development far clear and excellently documented.
